

# Weighbridge Calibration Services

## Calibration Services

- JWS Weighbridge Test Unit
- JWS Weighbridge Test Weights

## What is the purpose of a calibration?

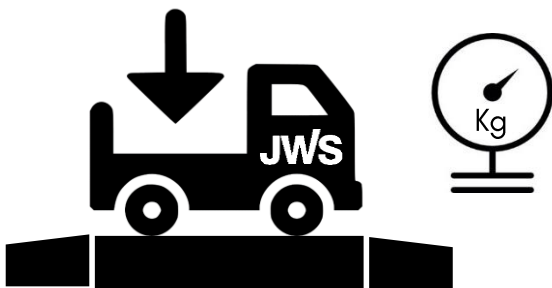

There are three main reasons for having instruments calibrated:

1. TO ENSURE READINGS FROM AN INSTRUMENT ARE CONSISTENT WITH OTHER MEASUREMENTS.
2. TO DETERMINE THE ACCURACY OF THE INSTRUMENT READINGS.
3. TO ESTABLISH THE RELIABILITY OF THE INSTRUMENT I.E. THAT IT CAN BE TRUSTED.

It is very important to have your weighbridge regularly calibrated to ensure ongoing accuracy and performance. Ideally checks should be a 6 monthly service check, with an annual calibration using a weighbridge test unit.

## Our Calibration Services

- ✓ Full Calibration Service and Trade Verification are available using Certified Calibration Weights
- ✓ Our calibration weights for weighbridge testing are traceable to UK National Standards.
- ✓ JWS carry out calibrations in accordance with the [UK Weighing Federation's Code of Practice](#).
- ✓ All our engineers are approved self-verifiers, ensuring a completely professional, thorough and efficient service.
- ✓ JWS are approved for the on-site verification of Weighing equipment to meet NAWI 90/384/EEC requirements. This ensures you remain compliant and your business can rely on the results from your weighbridge.

We know how important is an accurate weighbridge for your company.

At JWS we care about your business.
